

TrenchGuard

SAFE

Special interlocking flange joints eliminate panel movement.

Anti-slip tread pattern gives extra foot and wheel grip.

High visibility bright yellow and reflective strips.

TOUGH

Steel reinforced honeycomb structure gives extra strength.

Ultra strong plastic will not splinter around the edges.

LIGHTWEIGHT

Easy to handle and clip together.

QUICK INSTALLATION

No specialist equipment required.

LOAD STRENGTH

Loads of 500 kg per wheel over a 600mm trench supported*.

For street cover that is safe, strong and second to none, TrenchGuard sets a new standard in trench care and public safety.
